\*People described as clinically vulnerable

1. Aged 70 or older (regardless of medical conditions);

2. Under 70 with an underlying health condition listed below (that is, anyone instructed to get a flu jab as an adult each year on medical grounds):

- chronic (long-term) mild to moderate respiratory diseases, such as asthma, chronic obstructive pulmonary disease (COPD), emphysema or bronchitis;
- chronic heart disease, such as heart failure;
- chronic kidney disease;
- chronic liver disease, such as hepatitis;
- diabetes;
- chronic neurological conditions, such as Parkinson's disease, motor neurone disease, multiple sclerosis (MS), or cerebral palsy;
- a weakened immune system as the result of conditions such as HIV and AIDS, or medicines such as steroid tablets;
- being seriously overweight (a body mass index (BMI) of 40 or above);
- pregnant women.

Working safely during COVID-19 in other people's homes, HM Government, May 2020:

"No work should be carried out in a household which is isolating because one or more family members has symptoms or where an individual has been advised to shield - unless it is to remedy a direct risk to the safety of the household.

"When working in a household where somebody is clinically vulnerable, but has not been asked to shield, for example, the home of someone over 70, prior arrangements should be made with vulnerable people to avoid any face-to-face contact, for example, when answering the door.

"You should be particularly strict about handwashing, coughing and sneezing hygiene, such as covering your nose and mouth and disposing of single-use tissues."
